The Department of Accountancy organized a Leadership Training Camp on 17 June 2023 for the students of Master of Science in Professional Accounting and Corporate Governance (MScPACG). The training camp aimed at helping the students build trust when working in a team, enhance communication skills and team spirit, and challenge themselves.

The training camp kicked off with ice breaker games. Students were divided into groups and asked to set their goals for the day. The groups were engaged in several team challenges that focused on communication, problem-solving, conflict resolution, teamwork and self-challenge. After completion of the challenges, the students sat down with their facilitators to review and reflect what they had learned throughout the day.

The department hopes that the students were able to have fun and at the same time learned valuable skills through this experiential leadership training camp that can be applied in their daily life as well as future professional career.
