

Taught Postgraduate Career Training Workshop

The Department of Accountancy organized a Career Training Workshop on 29 September 2023 for the students of Master of Science in Professional Accounting and Corporate Governance (MScPACG) Professional Accounting (PA) Stream and Master of Arts in International Accounting (MAIA).

Mr. Mackie Mak, a Senior Manager from PwC, was invited to hold the training session about group interview in the graduate recruitment process. The workshop aimed at equipping the students with the best capability to meet the Big-4 and other CPA firms as well as commercial firms' graduate recruitment challenges in coming September/October.

The workshop provided an introduction of the recruitment process. A mock group interview was also organized with students taking the role of participants or observers. The students were also provided individual feedback to highlight their strengths and areas of improvement throughout the workshop.

Prof. Zheng Liu, MScPACG programme leader, presented a token to Mr. Mackie Mak on behalf of the Department to appreciate his time and effort. The Department hopes that the students were able to acquire skills through this workshop, which can give them an advantage during the recruitment process.
