

WOMEN IN INVESTMENT INSIGHT DAY

An Insight Day should not be about watching presentations. It should be about building a picture of what your future could look like. Our event will be an immersive introduction to the range of career opportunities available in a global asset management firm.

An Insight Day should not be boring. It should challenge you to consciously engage with your own learning. You will navigate through a host of skills sessions and workshops to help you grasp the nature of what we do, and what drives our passion to do it. You will have an opportunity to network with our industry leading experts and graduate analysts alike, to gain a first-hand, authentic view of how a career at Fidelity could work for you.

We are looking for first and second year students with a strong academic background and a genuine motivation to know more about Fidelity International and the asset management industry. You will have excellent verbal and written communication skills, and be highly analytical. Fidelity International has a family feel, so we want to know about those extracurricular activities which tell us who you really are.
