

Extracurricular Activities Sharing *by Anny Lee*

Study

Online Summer Program - Nagoya University of Commerce and Business

I engaged in an online summer program held by Nagoya University of Commerce and Business, which was about Leading through a crisis, with anchors of Japan and the COVID-19 pandemic. With 14 different nationalities, we learned much about other experiences and opinions according to their cultural backgrounds. It also encouraged us to express our creative thinking and diverse views by carrying out many activities, including discussion, presentation, case stimulation, and workshop. We have built up good relationships and critical thinking afterward.

Cross-Institutional Course Enrollment Scheme

It is a scheme offering you the chance to study GE courses at Hong Kong Baptist University. I took the “Hong Kong between Past and Present” course from an area of “Arts and humanities.” Being a student in two universities simultaneously was a

memorable experience, which enriches your campus and cultural experiences. I was able to engage in talks and volunteering services designed for BUHK students, which broaden my horizon.

Internship

The Bank of East Asia Ltd, Tianjin Branch

By working at the Bank of East Asia, I understood more about the banking industry, and there were so many professionals I could learn from. Throughout the internship, I worked at the Department of Compliance and International Trade, which was something new and a bit challenging for me. But with the help of colleagues and supervisors who are friendly, I successfully finished the internship and was selected to be one of the representatives to having sharing with guests from the Hong Kong and Tianjin government, which enhanced my communication and presentation skills. I had so much fun when living in Tianjin. I made many new friends, and we had the traditional Tianjin food and visited many places recommended by my supervisors together.
