

## **Experience at CityU** by *Pim Thanomsakyuth*

My experience in CityU's Management is highly enriched and worthwhile. I am an international student studying in strategic and international management stream. My experience was highly enriching and worthwhile. In my three years of study, not only have I met a lot of classmates from all around the globe, but I have also had the opportunity to study under highly-qualified and internationally-recognized professors. I used to be scared that if I came to Hong Kong for my undergraduate degree, I might encounter a language barrier while studying since I do not speak Chinese. Little did I know that in CityU, courses and assignments are conducted entirely in English. As a foreigner, I do not feel any difficulty in understanding the courses. In my stream, I have learned a lot about developing effective strategies for doing business in the international environment, which is vital nowadays as globalization is the era. Moreover, our Management department also provides students, like me, the opportunity to do an internship and go on an exchange program abroad. Living alone in another country as an international student is not easy. Yet, staff and professors at the Management department are very supportive and considerate. Every time I encounter any academic difficulty, they always reach out and help in no time. I always feel assured and safe as I know there will be people willing to help me. Even when I have no problem, the department will reach out to me through E-mail regularly to announce and update me about important things. Additionally, I have often met the alumni who came back to share their working experiences in Management classes. It is an excellent opportunity for me to learn from their experience and use those after I graduate. To summarize my experience in the CityU Management department, I would say that it allowed me to connect myself with world-class talented people who shared their exceptional expertise and knowledge that could be hard to find elsewhere. I never regretted choosing to study Management at CityU.
