# Ideas to Action

## BBA in Global Operations Management (JS1027) 工商管理學士 (環球營運管理)

**WHY GOM?** All businesses need operations management (OM) in order to function, as it focuses on how companies can create compelling products or services in a cost-effective way. Operations management skills can be applied across all industries, hence there is a growing demand for executives with solid OM knowledge and skills globally and locally.

**BBA Global Operations Management** is a major designed to provide comprehensive training to prepare students for consultant and managerial positions. Other than operations knowledge, GOM equips students with management techniques in project management and basic analytics with spreadsheets, training students' critical thinking and presentation skills through case studies courses.

## Market-driven Curriculum – Major Core Courses

### Operations Knowledge

# INTERNSHIP

With placements in international businesses, banking, financial services, insurance, retail and hospitality, etc., students can

- Gain real-life hands-on working experience
- Acquire solid knowledge and sharpen their interpersonal skills
- Build network and enhance competitiveness for their future career

Tokyo Stock Exchange

“ I had the opportunities to reach out to people from different professions and learnt what cannot be found from textbooks or lectures. ”

Mitsubishi Okazaki Plant

“ There’s no education quite like the lessons of travel. ”

**Students visit companies and places of special interests at overseas tours to:**

- Acquire knowledge of real-world businesses in a different cultural context
- Interact and network with local community
- Have fun while learning

**OVERSEAS STUDY TOUR**

# EXCHANGE PROGRAM

We offer diverse exchange opportunities to students to study abroad in different countries. The program allows students to

- Expand international exposure
- Improve language skills
- Enhance planning, analytical and problem-solving skills
- Learn more about themselves and another culture
- Become more mature and independent

It surprised me when I saw students in such a land of freedom having a high level of discipline, coming to class punctually, having their phones and laptops away and actively making notes.

**This program has changed me a lot.** I became more **independent**. I also improved my **spoken English proficiency** and **made more friends** coming from other parts of the world. Moreover, I feel **more open to a diverse working environment**.

When I travelled to different places, I also **explored the unique culture and history there**. For example, I got to know the long, tragic history of the slavery of Chinese migrants when I visited the Chinatown of San Francisco, while my trip in New York really allowed me to feel the pulse of the world's busiest city.

Miss Faith Lam  
*University of Wisconsin – Madison, USA*

Our global exchange partners include universities in Asia, Australia, Europe and North America.

# ENRICHMENT

At MS, students can participate in projects or events to put their academic knowledge into practice.

## Real-life Business Consulting Projects

GOM students are offered opportunities to participate in consulting projects for international companies, applying their knowledge in solving real-life business problems. Here are some of the projects:

Collaborating Company	Project
ParknShop	Designing a new layout of the picking area in warehouse
Cathay Pacific Catering Service	Optimizing the flow of canvas trolleys & waste reduction
IKEA	Workflow optimization

## Joint University Big Data Competition

Through participating in a joint-school Big Data competition with the Faculty of Statistics of Renmin University of China, BDAN students can interact with Beijing students and use innovative ways to apply what they learnt to solve real-life big-data problems.

4-Day Programme		
Data analysis*	Determination of research topics & analysis methods	Presentation & reporting of results

\* 2019 Event - Review of Big Data from a renowned e-commerce operator: sales data of mobile phone & the corresponding comments, mobile phone parameters & promotion information.

According to the *U.S. News & World Report*, Market Research Analyst, Operations Research Analyst and Business Operations Manager have been among the top 10 business jobs for five consecutive years. **The career path of our graduates is promising. Possessing strong analytical and technical skills as well as solid business knowledge**, MS graduates have **different career options** such as analyst, consultant or managerial positions. The program prepares them for a career track into top management positions.

## Our graduates work in diverse industries

- Accounting
- Banking, Finance & Insurance
- Business Consulting
- Manufacturing/ Operations
- Supply Chain & Logistics
- Hospitality & Retail
- Information & Communications
- Public Services/ Education

## Selected list of employers

- Accenture
- Airport Authority
- Bank of China
- Cathay Pacific
- CLP

Jardine Executive Trainee, Jardine Matheson

**Mr Roy Tam**  
*Management Trainee*  
2021 graduate

I am now working at HSBC as Global Graduate Trainee. GOM provides **practical case studies** to identify the critical element to operate and maintain the business from investigating the service blueprint to measure with analytics tools and the process improvement. Besides, the department provided **different professional training** during the semester break, such as Machine Learning, Blockchain and Six Sigma, which enhanced our professional capability. The package provided by GOM is **comprehensive to equip me as a young talent**. Furthermore, GOM talent is highly demanded by various industries such as Consulting, Banking, Logistics and Retailing.

**Miss Yoyo Li**  
*Technical Consultant*  
2019 graduate

The solid foundation we built here allows us to dive deeply into the areas that interested us: **risk management, machine learning, marketing research**, ...you name it.

I truly appreciated all the **opportunities** and **exposure**, from **certification workshops** to **overseas competitions** and **study tour**, that I am given during my study. Step by step, I shape my career goal and enter a field which I am passionate in.

**Mr Phil Lo**  
*Management Trainee*  
2019 graduate

BDAN is one of the **most practical programs**, which not only trains students to be an **analytical and logical thinker**, but also equips us with most sought-after programming skills for statistical and data analysis.

The BDAN major courses cultivated my ability to **diagnose problems, analyze data, identify patterns** and **devise solutions**, which I believe are of significant importance regardless of the industry and the role.

**Mr Andy Lau**  
*Management Consultant*  
2018 graduate

I am currently working as a consultant in KPMG China Management Consulting Department. The major function of our team is to provide **consulting service** concerning operations and customer experiences for the clients, including **digital & operational transformation, project management, supply chain optimization** and marketing strategy. The **supply chain management knowledge** learnt in GOM helps me **better understand the difficulties faced by my clients**. It allows my team to provide the best solutions for them.
